Sliders

PROTECTION

CORNER POST (Sigma purlin)

Obtain a more rigid attachment using the two sigma purlins, (can also be filled with concrete for extra solidity).

Mainly used as a corner post and for areas with high concentrations of livestock (restraining alley).

The Beiser attachment kit includes: 12 screws M12x30, 12 nuts M12 and 24 washers M12 for the assembly of the 6 sliders on the post.

You are strongly recommended to fill the corner post with concrete.

SINGLE POST (Sigma purlin)

Quick attachment of sliders.

Attached perpendicularly to the slider to optimise resistance.

Height: 2.65m

The Beiser attachment kit includes 6 screws M12x30, 6 nuts M12 and 12 washers M12 for the assembly of the slider on the post.

ATTACHMENT KIT FOR 2 SLIDERS

To assemble 2 sliders together, ideal overlap is equal to 30 cm.

The Beiser kit includes 4 screws M12x30, 4 nuts M12 and 8 washers M12 for the assembly of 2 sliders
