

Galvanised basic fuel station

Fuel stations

TANKS

galvanised basic fuel station

TECHNICAL CHARACTERISTICS

HDPE fuel tank with metal reinforcements; meets the requirements of NF standards

Fuel pump 60L/min, 220 V, with:

6 m suction and discharge hoses

Automatic gun

Flowmeter with summer

Differential circuit breaker

Gauge

Filling plug

Diesel filter water settling tank

Cabinet:

Lock up your pumping equipment

Restrict access to authorised individuals

Galvanised retention tray with:

2 securing points

Padlock-compatible galvanised tipup cover

Galvanised base with fork slots

OPTION
EXTENDED WARRANTY FOR THE TANK
2-year - 5-year - 10-year

info
For fuel storage and fuel distribution, locking device

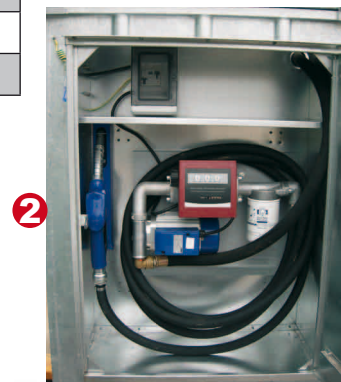

The small galvanised retention tray with its thickness of 3 mm protects the tank against any impact or vandalism. It can also be used to ensure compliance with standards on pollutant products

Reference	Capacity in Litres	L in mm	W in mm	H in mm
