Rail cross bar

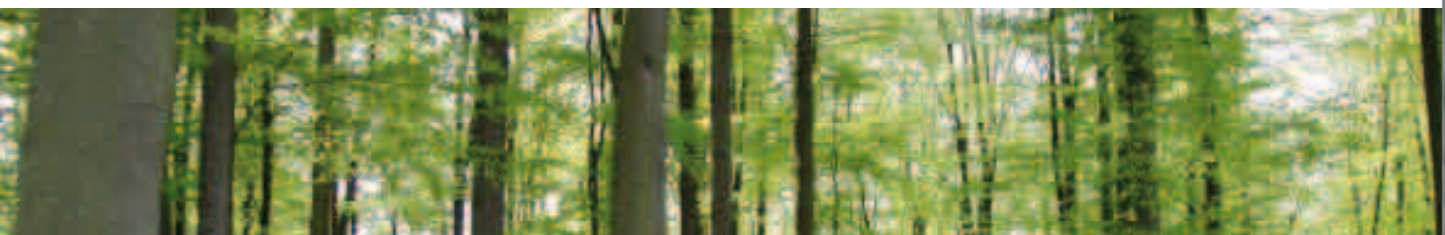

New

PEFC France (Association operating under the law of 1901) Its members include all forest actors: ONF (French forest office), forest municipalities and private property, associations protecting nature, the wood industry, etc. These are approved and independent bodies which ensure the protection of the forests and monitor all activities, guaranteeing the traceability of wood.

PROTECTION

Beiser commits to promoting forest ecomanagement by selling selected woods. Wood harvesting matches the natural cycle of the forest:: leaving room for young trees and encouraging the vitality of other trees.

Beiser wood with the PEFC label protects the environment and ensures exceptional quality.

And naturally, quality!
